

Inflammatory Bowel Disease

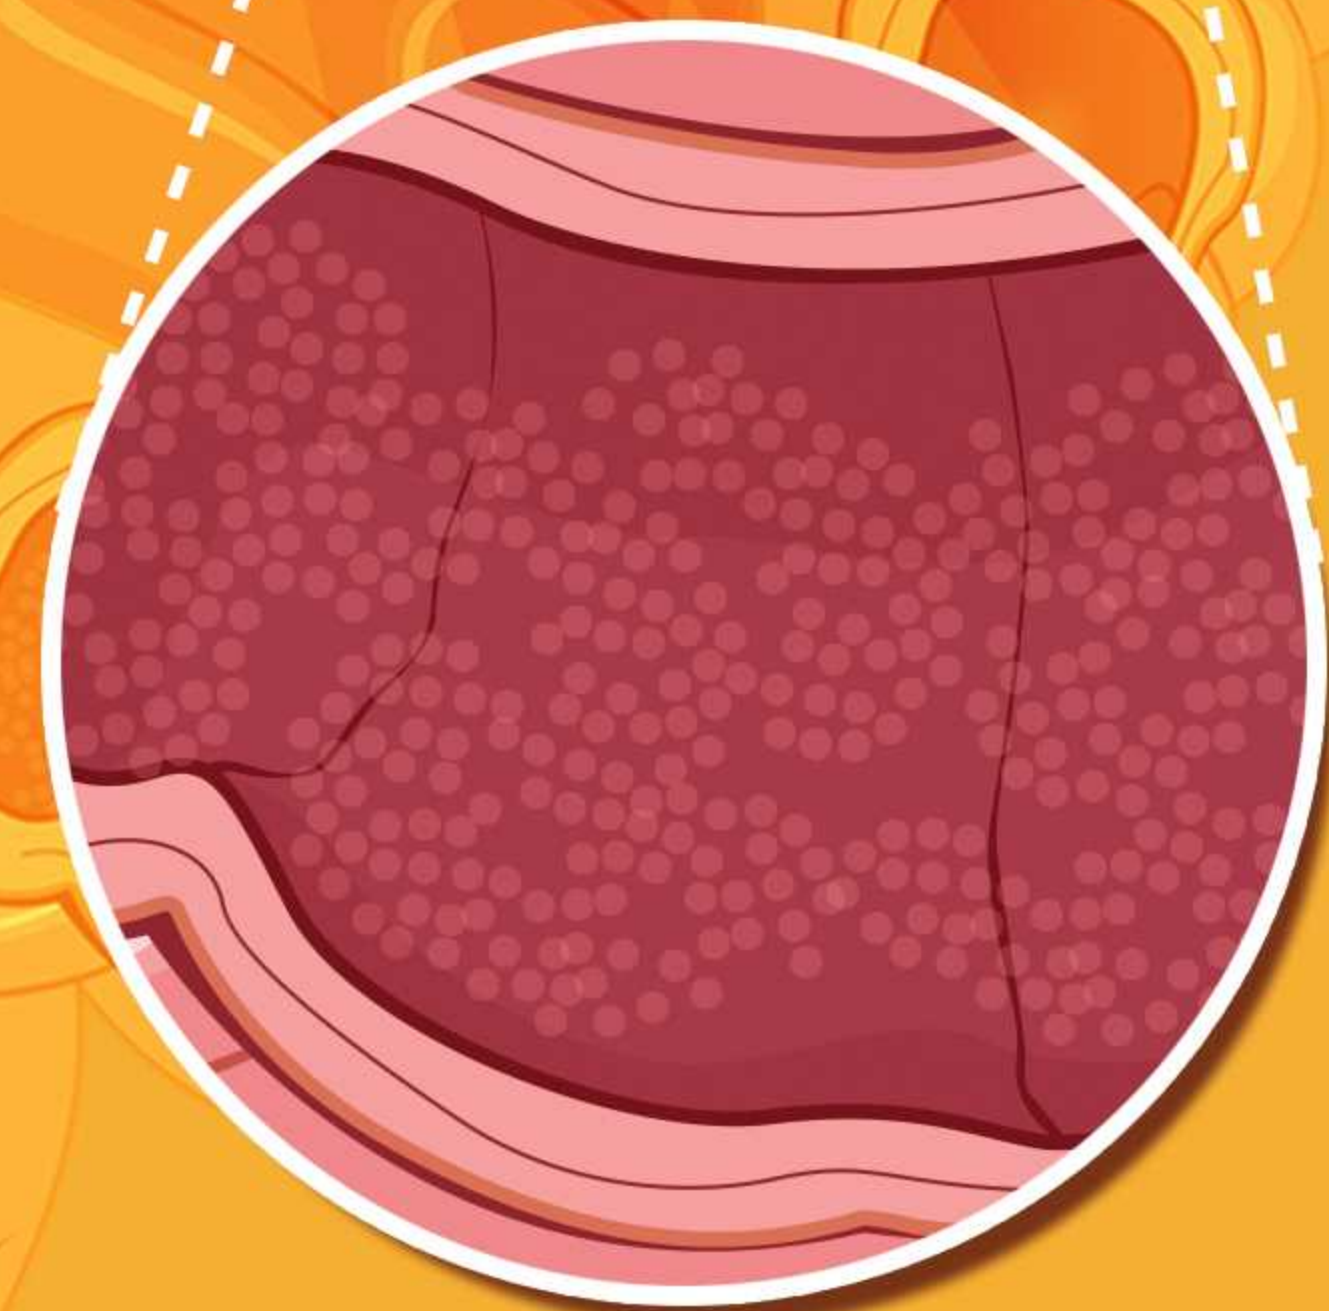

Inflammatory bowel disease (IBD) is an umbrella term used to describe disorders that involve chronic inflammation of your digestive tract.

Types of IBD include:

Crohn's disease

This type of IBD is characterized by inflammation of the lining of your digestive tract, which often can involve the deeper layers of the digestive tract.

Ulcerative colitis

This condition involves inflammation and sores (ulcers) along the superficial lining of your large intestine (colon) and rectum.
